PREFAC.

In compliance with the request of a deputation of Yacht Owners and others interested in yachting, the Committee of Lloyd's Register of British and Foreign Shipping determined in 1877 to provide a Register for the faithful and accurate Classification of Yachts and to adopt Rules and Regulations applicable to this description of vessel.

The Register of Yachts, which is printed solely for the use of Subscribers, is issued in May annually, and a supplement containing additions and corrections is issued during the year.

The Register of Yachts contains the names, particulars and characters of Yachts classed by the Society, together with the names and particulars of other Yachts so far as known, *also a separate list of yachts of the International Rating Classes arranged according to Rating and particulars of the Certificates of Rating issued to these Yachts by the different National Authorities* (*see* pages 639 and 665). The appendix contains a List of the various Yacht and Sailing Clubs and illustrations of their respective Flags, an illustrated List of the Flags of Yachts, an Index of Signal Letters, a List of Yachts which ve had Names Changed, a List of Yachts arran according to tonnage, a List of Builders and Desig with the Names of Yachts built or designed by the o far as they can be ascertained, an Alphabetical st of the names and Addresses of Yacht Owner ith the Yacht Clubs to which they belong, and a st of Yacht Owners who have obtained Certific as Masters.

It [illegible] *be observed that with a view to facilitate referenc the part of Foreign Subscribers, the List of Contente Key to the Register, the titles of the various sections the Book and the headings of the columns are prin in the French and German languages as well as English.*

In vie f the publication of a separate Register for Ameri and Canadian Yachts, the list of American Yachts h has hitherto appeared in the British Register been discontinued, but to meet the convenien f subscribers, particulars of the larger American chts have been included in the ordinary list with th of yachts of other nationalities.

The Sub ption to the Register of Yachts is One

Guinea per annum (or such other sum as the Committee may fix), for which one copy of the Book is supplied.

Rules for the Building and Classification of Wood, Composite, and Steel Yachts are also issued by the Committee of Lloyd's Register, as well as special Rules for the Building and Classification of Yachts of the International Rating Classes.

The Rules for Yachts of the International Rating Classes have been prepared in accordance with the resolutions of the International Conference on Yacht Measurement, and have been accepted by the Permanent Committee of Referees on behalf of the Conference.

The aim in preparing these Rules has been to arrange for such scantlings as will enable a yacht to withstand the strains consequent on racing, and when her racing life is over to be converted into a useful and serviceable cruiser.

The Tables give the requirements for Wood, Composite, and Steel Yachts for each of the International Rating Classes, from 5 metres to 23 metres inclusive, and are made out on the metric system as well as in the English measurements, in order to ensure uniformity in the different countries.

In order to obtain the special class "R" assigned to Yachts of the International Rating Classes, the yacht will require to be built under the special survey of one of the Society's Surveyors.

An application for the survey should be made by either the Owner or Builder, who should state the rating class for which the vessel is intended. Either plans or a specification of the yacht (on a form specially prepared for the purpose) showing the scantlings and the materials proposed, should accompany the application for survey.

The specification forms above referred to and forms of request for special survey of Yachts intended for the International Rating Classes, may be obtained on application to this office, or to any of the Surveyors to Lloyd's Register.

PRÉFACE.

Pour satisfaire à la demande d'une délégation de propriétaires de Yachts, et autres intéressés dans le Yachting, le Comité du Lloyd's Register of British and Foreign Shipping décida, en 1877, dans le but de permettre de donner aux yachts une classification fidèle et rigoureuse, de publier le "Yacht Register" et d'adopter des statuts et règlements applicables à cette catégorie de navires.

Le "Yacht Register," qui est uniquement publié pour l'usage des abonnés, parait chaque année en Mai et un supplément, donnant les additions et corrections apportées au dit ouvrage, est publié dans le courant de l'année.

Le "Yacht Register" donne les noms et les cotes, avec d'autres renseignements, des Yachts cotés par la société et, dans la mesure du possible, les noms, avec d'autres renseignements, des autres yachts, *ainsi qu'une liste distincte des yachts, de la jauge internationale, classés par série et des renseignements sur les certificats de jauge qui ont été délivrés aux yachts de la jauge internationale* (pages 639 et 665). L'Appendice renferme ; une liste des yacht clubs et des sociétés de la voile, avec l'illustration de leurs pavillons respectifs, l'illustration des pavillons des yachts, un index des lettres de signaux, une liste des yachts ayant changé de nom, une liste des yachts classés d'après leur tonnage, une liste des constructeurs et des dessinateurs de yachts et, dans la mesure du possible, des yachts qu'ils ont construits ou dessinés, une liste alphabétique des propriétaires de yachts avec leur adresse et les différents yacht clubs dont ils font partie, ainsi qu'une liste des propriétaires de yachts avec leur adresse et les différents yacht clubs dont ils font partie, enfin une liste des propriétaires de yachts ayant obtenu des certificats de capitaine.

Pour permettre aux abonnés étrangers de consulter, utilement, le "Yacht Register," la table des matières, la table explicative, les titres des différentes parties de l'ouvrage et les en-tête des colonnes, paraissent actuellement aussi bien, en Français et en Allemand, qu'en Anglais.

Depuis la publication d'un Annuaire distinct pour les yachts Américains et Canadiens, la liste des yachts Américains, qui avait été publiée jusqu'ici dans le "Yacht Register," a cessé de paraître ; mais, pour la

commodité des abonnés, les renseignements, sur les plus grands yachts Américains, continueront à paraître avec ceux fournis pour les yachts des autres nationalités.

Le prix de l'abonnement au "Yacht Register" est de une guinée (frs. 26·50) par an (ou tout autre prix qui serait fixé par le Comité), et l'abonné a droit à un exemplaire.

Les Règlements, relatifs à la construction et à la classification des Yachts en bois, composites, ou en acier, sont également publiés par le Comité du Lloyd's Register, ainsi que les Règlements relatifs à la construction et à la classification des yachts de la Jauge Internationale.

Les Règlements de la Jauge Internationale ont été rédigés, conformément aux dispositions prises par la conférence internationale sur les mesurages des yachts, et ils ont été homologués, par la commission permanente, en vertu des pouvoirs que lui avait conférés la Conférence Internationale.

Le but envisagé, dans l'établissement de ces Règlements, a été de déterminer des échantillonnages permettant aux yachts de supporter les fatigues inhérentes aux régates, tout en leur permettant d'être convertis, une fois cette carrière terminée, en bons bateaux de croisière.

Les Tables donnent les échantillonnages requis par les yachts, en bois, composites, ou en acier, de chacune des séries de la Jauge Internationale, de 5 à 23 mètres inclus ; et de façon à assurer une application uniforme dans les différents pays, les échantillonnages ont été établis aussi bien dans le système métrique, qu'en mesures Anglaises.

Pour obtenir la cote spéciale "R" de la Jauge Internationale, on devra faire construire le yacht sous la surveillance spéciale d'un des Inspecteurs de la société.

Les demandes de visite seront faites par les propriétaires ou les constructeurs, qui auront à indiquer la série à laquelle le yacht est destiné. Les demandes devront être accompagnées soit de plans, soit d'une spécification, (sur un modèle spécial rédigé à cet effet), indiquant les échantillonnages et les matières proposées.

On pourra se procurer, soit au siège de la société, soit auprès des Inspecteurs du Lloyd's Register, des modèles de spécification et de demande de visite spéciale, pour les yachts destinés à la Jauge Internationale.

71, Fenchurch Street, Londres, E.C., *Mai* 1914.

VORWORT.

Auf Anregung einer Deputation von Yachtbesitzern und anderen Yachtinteressenten fasste das Committee of Lloyd's Register of British and Foreign Shipping im Jahre 1877 den Entschluss, ein Register über die getreue und richtige Klassifizierung der Yachten herauszugeben und Vorschriften für diese Art Fahrzeuge auszuarbeiten.

Das Yachtregister, welches ausschliesslich für den Gebrauch der Abonnenten gedruckt wird, kommt alljährlich im Mai zur Ausgabe und ein Nachtrag der Zusätze und Aenderungen wird im Laufe des Jahres herausgegeben.

Das Yachtregister enthält die Namen, Einzelheiten und Kennzeichen der bei Lloyd's Register klassifizierten Yachten, die Namen und Einzelheiten anderer Yachten, soweit dieselben bekannt sind, *sowie eine getrennte Liste der Yachten der internationalen Segelmeterklassen, nach Anzahl der Segelmeter geordnet und Angaben über die Segelmeterzertifikate welche an Yachten der internationalen Segelmeterklassen erteilt worden sind* (*auf* Seite 639 and 665.) Der Anhang enthält eine Liste der verschiedenen Yachtund Segelvereine nebst Illustration der Vereinsflaggen, ein illustriertes Verzeichnis der Yachtflaggen, ein Index der Unterscheidungssignale, eine Liste der Yachten deren Namen geändert worden sind, eine Liste der Yachten nach dem Tonnengehalt geordnet, ein Verzeichnis der Yachterbauer und Konstrukteure, mit den Namen der von Ihnen erbauten resp. entworfenen Yachten, soweit dieselben festgestellt werden konnten, ein alphabetisch geordnetes Verzeichnis der Namen und Adressen der Yachtbesitzer, mit Angabe der Yachtklubs, welchen sie angehören und eine Liste der Yachtbesitzer, welche das Kapitänspatent erlangt haben.

Es ist bemerkenswert, dass, zur leichteren Verständigung der ausländischen Abonnenten, das Inhaltsverzeichnis, die Erläuterungen zum Register, die Titel der verschiedenen Abschnitte, sowie die Ueberschriften jetzt sowohl in Französisch und Deutsch, wie auch in Englisch gedruckt werden.

Mit Rücksicht auf die Herausgabe eines getrennten Registers für amerikanische und kanadische Yachten, wird die Liste der amerikanischen Yachten, welche bisher im British Register erschienen ist, nicht mehr fortgeführt; zur Bequemlichkeit der Abonnenten sind jedoch die Einzelheiten der grösseren amerikanischen

Yachten in der gewöhnlichen Liste, zusammen mit denjenigen der Yachten anderer Nationen enthalten.

Der jährliche Abonnementspreis des Yachtregisters beträgt 1 Guinea (Mk. 21.50) (oder ein anderer Betrag, wie vom Committee festgesetzt), wofür ein Exemplar des Buches geliefert wird.

Vorschriften, für den Bau und die Klassifizierung von hölzernen, composit und stählernen Yachten, werden ebenfalls vom Committee of Lloyd's Register herausgegeben, desgleichen besondere Vorschriften für den Bau und die Klassifizierung der Yachten der internationalen Segelmeterklassen.

Die Vorschriften der internationalen Segelmeterklassen sind übereinstimmend mit den Beschlüssen der "International Conference on Yacht Measurement" ausgearbeitet und sind von dem "Permanent Committee of Referees on behalf of the Conference" anerkannt.

Bei Ausarbeitung dieser Vorschriften wurden solche Materialstärken zu Grunde gelegt, welche die Yacht befähigen, den Rennanstrengungen standzuhalten und nach beendeter Rennlaufbahn eine brauchbare Tourenyacht abzugeben.

71, Fenchurch Street, London, E.C., *Mai*, 1914.

Die Tabellen geben die Anforderungen für hölzerne, composit und stählerne Yachten für jede der internationalen Segelmeterklasse von 5 bis einschliesslich 23 Meter an und sind, um eine Gleichmässigkeit in den verschiedenen Ländern zu sichern, sowohl in Metern, als auch in englischen Massen aufgestellt.

Um die Specialklasse "R", welche den Yachten der internationalen Segelmeterklasse erteilt wird, zu erlangen, müssen die Yachten unter Specialaufsicht eines Lloyd's Surveyors gebaut werden.

Ein Antrag zur Besichtigung muss entweder von dem Besitzer oder dem Erbauer, unter Angabe, für welche Segelmeterklasse das Fahrzeug bestimmt ist, gestellt werden. Dem Besichtigungsantrag sind entweder Pläne oder eine Specifikation der Yacht (auf einem eigens hierfür angefertigtem Formular), woraus die Profile und Materialien ersichtlich sind, beizugeben.

Die oben erwähnten Specifikationsformulare, sowie die Antragsformulare für Specialbesichtigungen der für die internationale Segelmeterklasse bestimmten Yachten, sind auf Ansuchen entweder im Londoner Bureau oder von den Surveyors to Lloyd's Register erhältlich.

KEY TO LLOYD'S REGISTER OF YACHTS.

SYMBOLS OF CLASSIFICATION, COLUMNS 10, 11 & 12.

(All Abbreviations employed in the Register are explained in the Alphabetical Key, page 83.)

100A — Character of Yachts built of Steel or Iron in accordance with or equal to the Society's Rules and Tables.

90A — Character of Yachts built of Steel or Iron in some respects deficient of the requirements of the Society's Rules for the 100A class.

*⩓ — Character of Yachts built of Iron with thicker plating than the Society's Rules required for the ⩓ class.

⩓ — Character of Yachts built of Iron according to the Society's Rules in force between the years 1864 and 1871.

∧ — Without a numeral prefixed, character assigned to Iron and Steel Yachts already built to which the Society's Rules do not apply.

A — Character of Wood or Composite built Yachts of the first class. The figures prefixed to the character thus: 18 A, 12 A indicate the term of years for which the Vessel is at present classed. Figures placed within parentheses thus (17)A C(11) indicate the expired term of years — originally if on the first line, and on continuation or restoration if on lower lines.

A — Without a term of years indicates that the Yacht, though not built according to the Society's Rules, is considered worthy of the class assigned.

Lv / A1* — Lv / A1 — Characters assigned by the Underwriters' Register for Iron Vessels, now amalgamated with LLOYD'S REGISTER.

R — Character of Yachts built in accordance with the Rules for Yachts of the International Rating Classes both as regards scantlings and equipment. The figures prefixed to the character thus—16 R, 14 R, in the case of Wood and Composite Yachts, indicate the term of years for which the Yacht is at present classed. In the case of Steel Yachts, no numeral is prefixed to the character, the same being for an unlimited period subject to periodical surveys.

1 — The figure 1 after a character signifies that the Yacht is well and efficiently equipped (*see* Tables 24 & 25 of the Society's Rules for Yachts).

A line thus — after the letter A, ⩓ or A signifies that the equipment is *not* in accordance with the Society's Rules.

In the case of Yachts classed R, the figure 1 for equipment is not employed, the equipment being required in these cases to be in accordance with the Rules for Yachts of the International Rating Classes before the class is assigned.

† — Prefixed to the class of a Yacht indicates that she is also classed in the Register Book for Merchant Ships, and that the scantlings are equal to the requirements of the Society's Rules for the same.

The figures under a Character denote the date when the Yacht was last Surveyed by the Society's Surveyors.

When the port and date of Survey only appear without the Yacht's Character, the Character has expired or been withdrawn because a Survey prescribed in the Society's Rules has not been held, or on account of non-payment of fees.

✠ — This sign before a Character thus ✠100A1 denotes that the Yacht has been built under Special Survey.

✠ — This sign before a classification record of Machinery thus ✠LMC ✠NE&B indicates that the Engines and Boilers or both (according to the record which follows) have been built under Special Survey.

5,01 — A black line with date underneath indicates that the Yacht's Character was expunged from the Society's Register of Yachts at the date mentioned because, on account of reported defects, the Yacht was not entitled to a Character.

SYMBOLS OF CLASSIFICATION, COLUMNS 10, 11 & 12—*continued.*

5,01 A red line with date underneath indicates that the Yacht's Character was expunged from the Society's Register of Yachts at the date mentioned because, on account of non-compliance with the Society's Rules as regards Surveys, the Yacht was not entitled to retain her Character therein.

... This sign indicates that the Yacht's class was withdrawn from the Society's Register of Yachts at Owner's request.

When the eleventh and twelfth Columns are left blank, the Yacht has never been Classed in the Society's Register of Yachts.

EXPLANATION OF RECORDS IN THE REGISTER OF YACHTS.

Tonnage (column 4). The Thames Measurement tonnage appears in the Register in the case of every Yacht, and is printed below the official tonnages where these tonnages are given. The rule for computing the Thames Measurement tonnage is as follows:—From the length (measured from the fore side of stem to the after side of sternpost on deck) deduct the breadth, multiply this result by the breadth, and that product by the half breadth, and divide by ninety-four.

In the cases of Yachts which are officially registered, the official registered tonnage measured according to the law of the country to which the Yacht belongs is recorded in type like that shown at the side hereof. 204·51 (Net) 546·65 (Gross)

For some foreign Yachts, the tonnage which is recorded has been measured in accordance with British rules and is accepted under British law. In such cases, the fact is indicated by the use of italic figures, thus:— *204·51* (Net) *546·65* (Gross)

Dimensions (column 5). When the dimensions of a yacht are printed on the upper line provided for the purpose and not beneath dots, they are taken either from the vessel's Official Register or the Society's Surveyors' 1st entry report of survey.

In the case of unregistered and unclassed yachts the dimensions are placed beneath dots thus:— ... ... 32·0 | 7·5 | 4·5

The **length** recorded is the length measured from fore side of stem to aft side of stern-post on the range of the upper deck, except in the case of unclassed yachts which are officially registered as British vessels, when the registered length is recorded.

When two lengths are recorded the second is the water-line length.

When the length on the water-line only is given, the initials "W.L." appear below the length.

The **breadth** recorded is the extreme breadth.

The **depth** is taken from the top of floors to top of upper deck beams amidships.

Date of Build (column 7). The date of build recorded in the Register of Yachts, for yachts built under the survey of the Society's Surveyors, is the date when the yacht was launched, except for yachts built during 1903 and subsequently, in which cases the last date of survey for first entry of classification is recorded when such survey is completed within six months of the date of launching, but when the first entry survey is not completed within that period, six months later than the date of launching is then recorded as the date of build.

The date of build of engines and boilers is only recorded where the same differs from the date of build of the yacht, and, in these cases, the date appears in column 8.

Internal Combustion Engines (column 8)—

Alcohol Motor indicates an internal combustion engine using Alcohol as fuel.

Gas Engine indicates an internal combustion engine using gas as fuel.

EXPLANATION OF RECORDS IN THE REGISTER OF YACHTS—*continued.*

Oil Engine indicates an internal combustion engine using heavy oil such as Astatki, Mazut, etc., as fuel.

Paraffin Motor indicates an internal combustion engine using refined oil with a flash point higher than 73° F., such as Paraffin oil, Kerosene, Solar oil, etc., as fuel.

Petrol Motor indicates an internal combustion engine, using highly volatile oils, such as Benzoline, Gasoline, Petrol, etc., as fuel.

Nominal Horse Power (column 8). The formulæ from which the Nominal Horse Powers are calculated are :—

1. In cases of yachts in which the particulars of boiler pressures and surfaces are known :—

$$\text{NHP} = \frac{P+340}{1000}\left(\frac{D^2\sqrt{S}}{100}+\frac{H}{15}\right)$$ where the boiler pressure is below 160lb.

$$= \frac{P+590}{1500}\left(\frac{D^2\sqrt{S}}{100}+\frac{H}{15}\right)$$ where the boiler pressure is 160lb or above.

If the boilers are fitted with Forced Draught or Induced Draught appliances, then $\frac{H}{12}$ is taken instead of $\frac{H}{15}$.

2. In cases where particulars of the boiler pressures and heating surfaces are not known :—

$$\text{NHP} = \frac{D^2\sqrt{S}}{100}$$ for Triple and Quadruple Expansion Engines.

$$= \frac{D^2\sqrt{S}}{120}$$ for Compound Engines.

$$= \frac{D^2\sqrt{S}}{130}$$ for Single Engines.

In the above Rules, D = diameter of L.P. Cylinder in inches.
S = Stroke in inches.
H = Heating surface in square feet.
P = Working pressure in lb per square inch.

Asterisk * (column 9) before an Owner's name indicates that he has obtained the Board of Trade Certificate of competency as Master.

TABLE EXPLICATIVE CONCERNANT LE REGISTRE DES YACHTS.

MARQUES DE CLASSIFICATION, COLONNES 10, 11, & 12.

Toutes les abréviations, employées dans le Registre, ont leur définition dans la Table Explicative. (*Voir* **page 92.**)

100A Cote des Yachts, en fer ou en acier, construits conformément, ou d'une façon équivalente, aux Règlements et aux Tables de la Société.

90A Cote des Yachts, en fer ou en acier, construits, sous certains rapports, plus légèrement que les Règlements de la Société ne l'indiquent pour la cote 100A.

*⩓ Cote des Yachts, en fer, construits avec des tôles plus épaisses que celles réclamées par les Règlements de la Société pour la cote ⩓.

⩓ Cote des Yachts, en fer, construits conformément aux Règlements de la Société en vigueur de 1864 à 1871.

∧ Non précédé d'un coefficient, est une cote pour les Yachts, en fer ou en acier, déjà construits et auxquels les Règlements de la Société ne s'appliquent pas.

A Première cote des Yachts, en bois ou composite, dont l'armement est bon et suffisant. Le coefficient qui précède la cote, comme-ci : 18 A, 12 A indique le nombre d'années pour lesquelles le Yacht est actuellement coté. Le coefficient, placé entre parenthèses, comme-ci : (17) A C (11) indique les périodes expirées pour lesquelles le navire avait été coté. Placé à la première ligne, le coefficient indique la période originelle, aux lignes suivantes les périodes de continuation ou de restauration.

A Sans terme d'années, indique que le Yacht, quoique n'étant pas construit conformément aux Règlements de la Société, est considéré comme méritant la cote assignée.

Lv A1* Lv A1 Cotes assignées pour les navires, en fer, par l'"Underwriters' Register" actuellement fusionné avec le "Lloyd's Register."

R Cote des Yachts construits conformément aux Règlements de la jauge internationale tant comme échantillons que comme armement. Le coefficient qui précède la cote, comme-ci :—16 R, 14 R, dans le cas des Yachts en bois ou composite, indique le nombre d'années pour lesquelles les Yachts sont actuellement cotés. Dans le cas des Yachts en acier, aucun coefficient ne précède la cote, celle-ci étant assignée sans limite, sous condition des visites périodiques.

1 Le chiffre 1, à la suite d'une cote, indique que le Yacht a un armement bon et suffisant. (*Voir* Tableaux 24 & 25 des Règlements de la Société pour les Yachts.)

Le chiffre 1, à la suite des lettres A, ⩓ ou ∧, indique que l'armement est conforme ou équivalent aux Règlements de la Société.

— Ce signe, à la suite des lettres A, ⩓ ou ∧ indique que l'armement n'est pas conforme aux Règlements de la Société.

Pour les Yachts cotés R, il n'est pas fait usage du chiffre 1 pour l'armement qui doit, obligatoirement, être conforme aux Règlements de la jauge internationale avant que la cote puisse être assignée.

† Ce signe, précédant une cote, indique que le Yacht est aussi coté dans le "Register Book", pour les navires marchands, et que ses échantillons répondent aux Règlements du "Lloyds Register" pour cette dernière catégorie de navires.

Les chiffres, placés sous une cote, indiquent la date de la dernière visite passée par les inspecteurs de la Société.

Quand le port et la date de visite figurent sans la cote du Yacht, cela indique que la cote est expirée ou qu'elle a été rayée, soit parcequ'une visite prescrite par les Règlements de la Société n'a pas été passée, soit parceque les honoraires n'ont pas été payés.

MARQUES DE CLASSIFICATION, COLONNES 10, 11, & 12—*suite.*

✠ Ce signe, précédant une cote, comme-ci : ✠100A1 indique que le Yacht a été construit sous surveillance spéciale.

✠ Ce signe, précédant une annotation de classification de Machines, comme-ci : ✠LMC ✠NE&B indique que les Machines, ou les Machines et les Chaudières, suivant l'annotation, ont été construites sous surveillance spéciale.

5,01 Une ligne noire, avec date au-dessous, indique que la cote du Yacht a été retirée du Registre des Yachts de la Société, à la date indiquée, le Yacht ne pouvant conserver sa cote par suite de défectuosités signalées.

5,01 Une ligne rouge, avec date au-dessous, indique que la cote du Yacht a été retirée du Registre des Yachts de la Société, à la date indiquée, le Yacht ne pouvant conserver sa cote par suite de dérogations aux Règlements de la Société en ce qui concerne les visites.

... Ce signe indique que la cote du Yacht a été retirée du Registre des Yachts de la Société à la demande du propriétaire.

Quand les Colonnes 11 et 12 sont laissées en blanc, cela indique que le Yacht n'a jamais été coté dans le Registre des Yachts de la Société.

EXPLICATIONS DES ANNOTATIONS DANS LE REGISTRE DES YACHTS.

Jauge (colonne 4). La jauge de la Tamise figure dans le Registre pour chaque Yacht et est imprimée au-dessous des jauges officielles, quand ces jauges sont données. La règle, pour calculer la jauge de la Tamise, est la suivante :— Prendre la longueur sur le pont, depuis la face avant de l'étrave à la face arrière de l'étambot et en déduire la largeur, puis multiplier le résultat obtenu par la largeur et ce dernier résultat de nouveau par la moitié de la largeur et diviser par quatre-vingt-quatorze.

Pour les Yachts ayant un acte de Nationalité, la jauge officielle, mesurée suivant la loi de la nation à laquelle les Yachts appartiennent, figure en caractères comme ci-contre : 204·51 (Net) 546·65 (Brut)

Pour quelques Yachts étrangers, la jauge qui figure a été mesurée conformément aux Règlements Britanniques et acceptée sous la Loi Britannique. Dans ce cas, la jauge figure en italique, comme ci-contre : *204·51* (Net) *546·65* (Brut)

Dimensions (colonne 5). Quand les dimensions d'un Yacht sont imprimées à la ligne supérieure, réservée à cet effet, et qu'il n'y a pas de points au-dessus, elles sont prises, soit sur l'acte de Nationalité du Yacht, soit sur le rapport de l'Inspecteur de la Société, pour l'entrée en cote.

Pour les Yachts sans acte de Nationalité ou non cotés, les dimensions figurent sous des points, comme-ci :— ... 32·0 | ... 7·5 | ... 4·5

La **longueur** qui figure est mesurée, sur le pont, depuis la face avant de l'étrave à la face arrière de l'étambot, sauf pour les yachts non cotés, qui sont enregistrés officiellement comme navires anglais, et, dans ce cas, c'est la longueur enregistrée qui est indiquée.

Quand deux longueurs sont indiquées, la seconde est la longueur à la ligne de flottaison.

Quand seulement la longueur de la ligne de flottaison est indiquée, les lettres " W.L." figurent au-dessous.

La **largeur** qui figure est l'extrême largeur.

Le **creux** est mesuré, au milieu du navire, depuis le dessus des varangues au dessus des barrots du pont supérieur.

Date de Construction (colonne 7). La date de construction, qui figure dans le Registre des Yachts, pour les Yachts construits sous la surveillance des inspecteurs de la Société, est celle du lancement, si les Yachts ont été construits avant 1903. Pour les Yachts, construits depuis 1903 inclusivement, c'est celle de la dernière visite d'inspection pour l'entrée en cote, à condition que la dite visite soit passée dans les six mois que suivent la date du lancement. Si l'inspection, pour

EXPLICATIONS DES ANNOTATIONS DANS LE REGISTRE DES YACHTS—*suite.*

l'entrée en cote, n'est pas terminée durant la période stipulée, la date de construction prendra cours six mois après le lancement.

La date de construction des machines et des chaudières ne figure que lorsqu'elle diffère de celle de la construction du Yacht, et dans ce cas elle figure dans la colonne 8.

Yachts Automobiles (colonne 8) :—

"**Alcohol Motor**" indique une machine à combustion intérieure utilisant l'alcool comme combustible.

"**Gas Engine**" indique une machine à combustion intérieure utilisant le gaz comme combustible.

"**Oil Engine**" indique une machine à combustion intérieure utilisant des huiles lourdes comme combustible telles que Astatki, Mazut, etc.

"**Paraffin Motor**" indique une machine à combustion intérieure utilisant, comme combustible, des huiles raffineés ayant un point d'inflammation supérieur à 23° C. telles que pétrole, kerosene, solar, etc., etc.

"**Petrol Motor**" indique une machine à combustion intérieure utilisant des huiles extrêmement volatiles, comme combustible telles que Benzoline, Gazoline, Essence, etc.

Force en Chevaux nominaux (colonne 8) :—

1°. Si les pressions et les surfaces de chauffe sont connues :—

$$NHP=\frac{P+340}{1000}\left(\frac{D^2\sqrt{S}}{100}+\frac{H}{15}\right)$$ pressions au-dessous de 160 livres.

$$NHP=\frac{P+590}{1500}\left(\frac{D^2\sqrt{S}}{100}+\frac{H}{15}\right)$$ pressions de 160 livres et au-dessus.

Pour les chaudières à tirage forcé on devra substituer dans les formules ci-dessus, $\frac{H}{12}$ à $\frac{H}{15}$.

2°. Si les pressions et les surfaces de chauffe ne sont pas connues :—

$$NHP=\frac{D^2\sqrt{S}}{100}$$ Machines à Triple et Quadruple expansion.

$$NHP=\frac{D^2\sqrt{S}}{120}$$ Machines Compound.

$$NHP=\frac{D^2\sqrt{S}}{130}$$ Machines Simples

Dans les formules ci-dessus

D = diamètre en pouces du Cylindre B.P.

S = Course du piston en pouces.

H = Surface de Chauffe en pieds carrés.

P = Pression de travail en livres par pouce carré.

ERLÄUTERUNGEN ZU LLOYD'S REGISTER OF YACHTS.

KLASSIFIKATIONS ZEICHEN, SPALTE 10, 11, & 12.

(Alle im Register vorkommenden Abkürzungen sind in alphabetischer Reihenfolge auf Seite 100 erläutert.)

100A Kennzeichen der Yachten, welche übereinstimmend oder gleichwertig mit den Regeln, aus Eisen oder Stahl erbaut sind.

90A Kennzeichen der aus Eisen oder Stahl erbauten Yachten, welche nicht in allen Teilen den Vorschriften der 100A Klasse entsprechen.

*⩓ Kennzeichen der aus Eisen erbauten Yachten, mit stärkerer Aussenbeplattung als für die Klasse ⩓ vorgeschrieben ist.

⩓ Kennzeichen der Yachten, welche den Vorschriften der Jahre 1864–1871 entsprechend aus Eisen erbaut sind.

∧ ohne vorstehende Zahl. Kennzeichen der eisernen und stählernen Yachten, welche nicht in Übereinstimmung mit den Vorschriften erbaut sind.

A Kennzeichen für erstklassig erbaute, hölzerne oder komposite Yachten, welche eine vollständige Ausrüstung haben. Die Zahlen vor dem Kennzeichen (18 A, 12 A) geben die Anzahl der Jahre an, für welche die Yacht gegenwärtig klassificiert ist. Eingeklammerte Zahlen, z. B. (17) A C (11) geben die abgelaufene Anzahl Jahre an und zwar die ursprüngliche Anzahl, wenn in der oberen Reihe stehend und die verlängerte resp. wiederverliehene Anzahl von Jahren, wenn in der untern Reihe stehend.

A Ohne Angabe von Jahren deutet an, dass die Yacht, obwohl nicht nach den Vorschriften erbaut, als vollwertig für die eingetragene Klasse anzusehen ist.

Lv A1* Lv A1 Kennzeichen für eiserne Yachten festgesetzt durch das Underwriters' Register, welches jetzt zu Lloyd's Register übergegangen ist.

R Kennzeichen der Yachten, welche bezüglich der Materialstärke und Ausrüstung den Vorschriften der Internationalen Rennklasse entsprechend gebaut sind. Die vorstehende Zahl z. B. 16 R, 14 R, bei hölzernen und komposite Yachten giebt die Zahl der Jahre an, für welche die Yacht gegenwärtig klassificiert ist. Bei stählernen Yachten wird keine Zahl vor dem Kennzeichen geführt, dasselbe gilt für unbeschränkte Zeitdauer, vorausgesetzt dass die periodischen Besichtigungen ausgeführt werden.

1 Die Zahl 1 hinter dem Kennzeichen deutet an, dass die Yacht gut und genügend ausgerüstet ist, (siehe Tabelle 24 & 25 der Yacht Vorschriften).

Die Zahl 1 hinter den Buchstaben A, ∧ oder A deutet an, dass die Ausrüstung sowie Anker, Ketten und Trossen mit den Vorschriften übereinstimmen resp. gleichwertig sind.

Eine Linie — hinter den Buchstaben A, ∧ oder A besagt, dass die Ausrüstung sowie Anker, Ketten und Trossen *nicht* den Vorschriften entsprechen.

Bei Yachten der R Klasse wird die Ziffer 1 nicht angewendet, die Ausrüstung sowie Anker, Ketten und Trossen derselben müssen mit den Vorschriften der Internationalen Rennklasse übereinstimmen, bevor die Klasse erteilt wird.

† Dieser Vermerk vor der Klasse einer Yacht deutet an, dass dieselbe auch im Register Buch für Kauffahrtei Schiffe klassificiert ist und dass die Materialstärken mit den Vorschriften dieser Schiffe übereinstimmen.

KLASSIFIKATIONS ZEICHEN, SPALTE 10, 11, & 12—*Fortsetzung.*

Die Zahlen unter dem Kennzeichen geben das Datum der letzten Besichtigung durch einen Experten der Gesellschaft an.

In Fällen wo nur der Ort und das Datum der Besichtigung ohne Kennzeichen der Yacht im Buch erscheint, ist die Klasse entweder abgelaufen oder entzogen, weil eine vorgeschriebene Besichtigung nicht ausgeführt ist oder die Gebühren nicht bezahlt sind.

✠ Dieses Zeichen vor der Klasse ✠100A1 besagt, dass die Yacht unter Special Aufsicht von L. R. erbaut ist.

✠ Dieses Zeichen vor der Maschinenklasse ✠LMC ✠NE&B besagt, dass die Maschinen und Kessel unter Special Aufsicht von L. R. erbaut sind (die nachfolgenden Zahlen geben das Datum der Erbauung an).

5,01 Ein schwarzer Strich mit einem Datum darunter deutet an, dass die Klasse der Yacht an dem angegebenen Zeitpunkt im Yacht Register gestrichen ist, weil der berichtete, mangelhafte Zustand derselben ein Weiterführen der Klasse nicht zulässt.

5,01 Ein roter Strich mit einem Datum darunter deutet an, dass die Klasse der Yacht an dem angegebenen Zeitpunkt im Yacht Register gestrichen ist, da in Folge der nicht ausgeführten, vorgeschriebenen Besichtigungen ein Weiterführen der Klasse nicht zulässig war.

... Drei Punkte deuten an, dass die Klasse der Yacht auf Wunsch des Besitzers gestrichen worden ist.

Sind in Spalte elf und zwölf keine Angaben gemacht, so wird hierdurch angedeutet, dass die Yacht nie im Lloyd's Yacht Register klassificiert war.

ERLÄUTERUNG DER EINTRAGUNGEN IN DAS YACHT REGISTER.

Tonnengehalt (Spalte 4). Das Thames Vermessungsverfahren ist bei jeder Yacht unter dem amtlichen Tonnengehalt angegeben. Die Thames Vermessung wird, wie folgt, ermittelt:—

Von der, zwischen Vorderkante des Vorderstevens und Hinterkante des Hinterstevens, gemessenen Decklänge wird die Breite abgezogen, das Ergebnis wird zunächst mit der Breite und dann mit der halben Breite multipliziert, das Produkt wird durch 94 dividiert.

$$\text{Beispiel}: \frac{(L-B)\times B\times 0{\cdot}5\,B}{94}$$

Bei amtlich eingetragenen Yachten ist der Tonnengehalt, welcher dem Gesetz des Landes, dem die Yacht angehört, entsprechend vermessen ist, wie nebenstehend angeführt. } 204·51 (Netto) 546·65 (Brutto)

Bei einigen ausländischen Yachten, welche nach dem gesetzlichen, brittischen Verfahren vermessen sind, ist der Tonnengehalt, wie nebenstehend, in Cursivschrift angeführt. } *204·51* (Netto) *546·65* (Brutto)

Dimensionen (Spalte 5). Wenn die Dimensionen in der oberen Linie angegeben sind, so sind dieselben entweder dem amtlichen Schiffsmessbrief, oder dem ersten Eintragungsbericht des Besichtigers der Gesellschaft, entnommen.

Bei nicht amtlich eingetragenen und nicht klassificierten Yachten sind die Dimensionen unter Punkten, wie folgt, angeführt:— ... 32·0 | ... 7·5 | ... 4·5

Die eingetragene **Länge** ist von der Vorderkante des Vorderstevens bis zur Hinterkante des Hinterstevens auf dem Oberdeck gemessen, mit Ausnahme nicht klassificierter

ERLÄUTERUNG DER EINTRAGUNGEN IN DAS YACHT REGISTER—*Fortsetzung.*

Yachten, welche amtlich als englische Schiffe eingetragen sind, und bei welchen die amtlich eingetragene Länge angegeben ist.

Wenn zwei Längen angegeben sind, so ist die letztere die Wasserlinien Länge.

Wenn nur die Wasserlinien Länge angegeben ist erscheinen die Buchstaben "W.L." unter der Länge.

Die angegebene **Breite** ist die auf der Aussenhaut gemessene, äusserste Breite.

Die **Tiefe** ist von der Oberkante der Bodenwrangen bis zur Oberkante der Oberdeckbalken mitschiffs gemessen.

Datum der Erbauung (Spalte 7). Das eingetragene Erbauungsdatum für Yachten, welche unter Aufsicht eines Lloyd's Experten erbaut sind, ist dasjenige, an welchem die Yacht vom Stapel gelaufen ist, mit Ausnahme der Yachten, welche im Jahre 1903 und später gebaut sind; in diesen Fällen ist das letzte Besichtigungsdatum vor Eintragung der Klasse angegeben, vorausgesetzt dass diese Besichtigung innerhalb sechs Monate nach dem Stapellauf fertiggestellt ist, andernfalls gilt das Datum sechs Monate nach dem Stapellauf als Erbauungsdatum.

Die Erbauungsdaten der Maschinen und Kessel sind nur angegeben, wenn dieselben von den Erbauungsdaten der Yacht abweichen und sind dieselben in solchem Falle in Spalte 8 eingetragen.

Gas Maschinen (Spalte 8)—

Alkohol Motore sind solche, welche mit Brennspriet getrieben werden.

Unter **Gas Maschine** versteht man eine innere Verbrennungsmaschine, welche durch Gas getrieben wird.

Oel Maschinen sind solche, welche mit schweren Oelen, als Astatki, Mazut, ect., getrieben werden.

„**Paraffin Motor**" ist ein solcher, welcher mit raffinierten Oelen mit Entzündung über 23 C°, als Petroleum, Kerosin, Braunkohloel, ect., getrieben wird.

„**Petrol Motor**" ist ein solcher, welcher mit leichtentzündbaren Oelen, als Benzin, Gasolin, ect., getrieben wird.

Nominelle Pferdestärke (Spalte 8). Die nominelle Pferdestärke wird nach folgender Formel berechnet.

1. Bei Yachten, von welchen der Dampfüberdruck und die Heizfläche bekannt sind:

$$\text{NHP} = \frac{P+340}{1000}\left(\frac{D^2\sqrt{S}}{100}+\frac{H}{15}\right)$$ bei einem Dampfdruck von unter 160 Pfund.

$$= \frac{P+590}{1500}\left(\frac{D^2\sqrt{S}}{100}+\frac{H}{15}\right)$$ bei einem Dampfdruck von 160 Pfund und darüber.

Bei Kessel mit künstlichem Zug (Forced Draught oder Induced Draught) wird $\frac{H}{12}$ statt $\frac{H}{15}$ in Berechnung gezogen.

2. Bei Yachten, von welchen der Dampfüberdruck und die Heizfläche des Kessels nicht bekannt sind:

$$\text{NHP} = \frac{D^2\sqrt{S}}{100}$$ für drei oder vierfache Expansions Maschinen.

$$= \frac{D^2\sqrt{S}}{120}$$ für Compound Maschinen.

$$= \frac{D^2\sqrt{S}}{130}$$ für einstufige Expansions Maschinen.

In den vorstehenden Formeln bedeuten:

D = Durchmesser des Niederdruck Cylinders in Zollen.

S = Hub in Zollen.

H = Heizfläche in Quadrat Fuss.

P = Arbeitsüberdruck in Pfund per Quadratzoll.

INTERNATIONAL RULE OF MEASUREMENT.

RULE AND DURATION.

The rule of measurement is "The International Rule for Yacht Measurement and Rating." It is to be in force for ten years, from January 1, 1908, that is to say, until December 31, 1917.

FORMULA.

The formula is:—

$$\frac{L + B + \frac{1}{2}G + 3d + \frac{1}{3}\sqrt{S} - F}{2} = \text{Rating in linear units.}$$

i.e., either feet or metres.

Where L = Length in linear units.
" B = Beam in linear units.
" G = Girth in linear units.
" d = Girth difference in linear units.
" S = Sail area in square units.
" F = Freeboard in linear units.

LENGTH.

The length, L, for the formula is to be the length on the water-line (recorded as specified in paragraph 24 of the Instructions to Measurers), with the addition (1) of the difference between the girth, covering board to covering board, at the bow water-line ending, and twice the freeboard at that point, and (2) one-fifth the difference between the girth, covering board to covering board at the stern water-line ending, and twice the freeboard at that point.

BEAM.

The Beam, B, is to be taken from outside to outside of the planking, at the broadest place, including wales, doubling planks, and mouldings of any kind.

GIRTH.

The Girth, G, is to be the chain girth measured from the upper side of the covering board round the keel to the upper side of the covering board again, at that part of the yacht at which the measurement is greatest, less twice the freeboard at the same station. This station is to be indicated on the covering board by an official mark [G]. Should the chain girth be the same at several stations, that which is nearest to the greatest beam shall be adopted for subsequent measurements. But if the keel underside line abaft the girth station is straight, except for a reasonable round at the extreme after end, the station for the girth measurement may be fixed by the designer anywhere abaft 0·55 of the L.W.L. length from its fore end, provided that the maximum chain girth, covering board to covering board, does not exceed that at the station so fixed, anywhere forward of that station, or by more than 3 per cent. anywhere abaft of that station.

Should there be any hollow in the fore and aft underwater profile, the girth and difference measurements shall be taken under an imaginary keel line, excluding such hollow.

GIRTH DIFFERENCE.

The girth difference, d, in the formula, is to be the difference between the chain girth, measured as above described, from covering board to covering board, and the skin girth between the same points, measured along the actual outline of the cross girth.

SAIL AREA.

The sail area, S, is to be measured as stated in paragraph 31 of the Instructions to Measurers.

FREEBOARD.

The freeboard for the formula is to be twice the freeboard at the girth station, plus once the freeboard measured at the bow water-line ending for length measurement (*see* above), plus once the freeboard measured at the stern water-line ending, the sum to be divided by four.

CREW.

All measurements to be taken without crew on board.

MARKS.

Visible measurement marks on the hull must be in accordance with paragraph 13 of the Instructions to Measurers.

IMMERSION.

That the certificated rating be for the immersion of the yacht in water of the specific gravity of open sea water. Allowance is to be made in the case of vessels measured in fresh water, as prescribed in the Instructions to Measurers.

CABIN DIMENSIONS AND FITTINGS.

The restrictions as to cabin specifications to be in accordance with the annexed table.

MASTS.

Hollow wooden masts are prohibited in the classes above 32·8 feet (10 metres), and also hollow metal masts in all classes up to 75·4 feet (23 metres) inclusive.

TABLE OF CABIN FITTINGS.

Rules for cabin dimensions, specifications and the fittings of Yachts in the International Classes. All the Yachts exceeding 7 metres rating must be fitted below deck with ordinary fittings of a Yacht, efficiently constructed, which in number and size shall not be less than specified in the following table and description.

(*74·8 gallons.*)	When the yacht is submitted to measurement, these water vessels must be filled to their prescribed capacity in each case.

The "height of cabin" is measured from the floor line for purposes of measurement (N) to the under side of the deck, regardless of the deck beams. The "height of cabin" must be maintained over a distance of at least one-fifth the length of the Yacht on the line of flotation. The increased heights under the companions or other deck erections are not taken into account in the measuring of the "height of cabin." The round-up of the deck must not exceed one-twentieth of the greatest beam of the Yacht.

The following shall apply to all Yachts above 7 metres:—Frames and glazed skylights with sashes to open, to be fitted to *every cabin which extends across the Yacht*, having a clear deck opening of not less than 4 per cent. of the deck area of such cabin. A fixed companion, with sliding cover or other means of closing it, to be fitted, and a ladder or stairway, which may be hinged or pivoted, but must not be totally displaced when racing. Should a companion be fitted over a cabin, it shall be regarded as equivalent to a skylight. In all cabins the sides of the vessels above the fittings to be lined, either close, or if with battens, the space not to exceed 25 per cent. of the whole. Textile fabrics may be used for lining if fitted in wood frames. The following shall apply to Yachts of all classes:—During a race the platforms shall be kept down, bulkheads standing, and ladders and stairways in place, and all the other fittings specified in the table of Cabin fittings retained on board except cots, skylights and unfixed cooking apparatuses; no water may be started from or taken into the tanks; and the anchors and chains specified in the "Rules for the Building and Classification of Yachts" must be on board; all ballast must be properly stowed under the platforms or in lockers, and no ballast or other dead weights may be used as shifting ballast or for altering the trim of a Yacht. No ballast shall be shipped, unshipped, or shifted after 9 p.m. of the day previous to that on which the race is sailed.

¶ Yachts built before the acceptance of the Conference rule of 1906, can dispense with rules for cabin height or floor breadth.

‡ The actual floor may be at a different level.

† An extra number of berths in the cabin will replace the number of sleeping places for the crew.

* Any opening between the cockpit and the interior of the Yacht must be efficiently closed by an additional bulkhead or bulkheads.

INTERNATIONAL RULE OF MEASUREMENT—*continued.*

CLASSIFICATION.

The classes will be as follows:—

		Corresponding classes in English feet.	Limit to number of persons allowed on board during a race.
	Class A (above 23 metres)		
International Classes	23 metres	75·46	No limit.
	19 „	62·33	20
	15 „	49·21	14
	12 „	39·37	10
	10 „	32·80	8
	9 „	29·52	6
	8* „	26·24	5
	7 „	22·96	4
	6* „	19·68	3
	5* „	16·40	2

Among the classes of 10 metres and under, the classes* thus marked to be styled the principal classes, which clubs are specially recommended to encourage.

AMALGAMATION TO BE AVOIDED.

The international classes, when separately advertised, must never be amalgamated.

SCANTLINGS.

All Yachts will have to be classed with one of the three classification societies, viz., Lloyd's Register of British and Foreign Shipping, Germanischer Lloyd, or Bureau Veritas; and Yachts of the international classes so built will be classed R, denoting that their scantlings are as required for their respective rating classes. The tables of scantlings may be obtained on application from the Secretary of Lloyd's Register of British and Foreign Shipping, 71, Fenchurch Street, London, E.C.; or of the Germanischer Lloyd, Reichstags Ufer 16, Berlin N.W.; or the Administration of the Bureau Veritas, 8, Place de la Bourse, Paris.

TIME ALLOWANCE.

The allowance to be made between the old boats of each of the existing classes of the several countries and the corresponding new international class is to be assessed by the National Authorities of the several countries, and to be the same for all the old Yachts of each class, which must maintain their certificate of rating by measurement under the rule for which they were built.

OLD YACHTS.

Old Yachts will be allowed to race under special conditions until December 31, 1909. For the purpose of this rule an old Yacht may be considered as a Yacht which commenced building before June 13, 1906. If any old Yacht conforms with the scantling regulations and the accommodation rules, she may be regarded as a new Yacht for the purposes of the rule, and compete in her corresponding class.

WEIGHT.

The minimum displacement in the 5, 6, and 7 metre classes to be as follows:—

Class.	Displacement.
5 metres	750 kilos. (14 cwt. 85 lbs.)
6 „	1,200 „ (1 ton 3 cwt. 70 lbs.)
7 „	1,800 „ (1 ton 15 cwt. 48 lbs.)

SPECIAL RULES FOR CENTRE-BOARD YACHTS.

I. Boats weighing less than 750 kilos. shall be excluded from international regattas.

II. In centre-board Yachts.

(1.) A. If the draught without the c.—b. at the girth station is equal to $\frac{1}{3}$ B, or more, the measurement for *d* and G shall be taken under the bottom of the keel without regard to the c.—b., or with c.—b. hoisted.
B. If the draught without the c.—b. at the girth station is less than $\frac{1}{3}$ B, the girth measurement for *d* and G shall be taken to a point distant below the bottom of the keel by twice the difference between the actual draught without c.—b. and $\frac{1}{3}$ B.

(2.) In order to give G for the formula, one half of the greatest depth of the c.—b. from the underside of the keel shall be added to G, taken as above.

III. Centre-board Yachts are not allowed to race either with keel Yachts or alone, unless expressly so stated in the announcement of the race.

IV. The minimum displacement of centre-board Yachts to be as follows:—

Class.	Displacement.
5 metres	750 kilos. (14 cwt. 85 lbs.)
6 „	1,200 „ (1 ton 3 cwt. 70 lbs.)
7 „	1,800 „ (1 ton 15 cwt. 48 lbs.)
8 „	2,600 „ (2 tons 11 cwt. 20 lbs.)
9 „	3,700 „ (3 tons 12 cwt. 93 lbs.)
10 „	5,000 „ (4 tons 18 cwt. 47 lbs.)

In order to avoid ballasted centre-boards, the maximum weight of the centre-board in each case to be as follows:—

Class.	Displacement.
5 metres	50 kilos. (110 lbs.)
6 „	75 „ (1 cwt. 53 lbs.)
7 „	125 „ (2 cwt. 51 lbs.)
8 „	200 „ (3 cwt. 105 lbs.)
9 „	300 „ (5 cwt. 101 lbs.)
10 „	400 „ (7 cwt. 98 lbs.)
12 „	700 „ (13 cwt. 87 lbs.)
15 „	1,300 „ (1 ton 5 cwt. 66 lbs.)

CERTIFICATE OF RATING.

As soon as a Yacht has been measured, the measurer shall forward the measurements (with the sail-maker's diagram, if necessary), to the Secretary of the National Authority, who shall in due course, and after receipt of the Classification Society's certificate, issue a certificate of rating, which shall be in force from the date of the completion of the measurement. If from any peculiarity in the build of the Yacht, or other cause, the measurer shall be of opinion that the rule will not rate the Yacht fairly, or that in any respect she does not comply with the requirements of these rules, he shall report the circumstances to the National Authority, who, after due inquiry, shall award such certificate of rating as they may consider equitable, and the measurement shall be deemed incomplete until this has been done.

ERRORS IN CERTIFICATE.

Should the certificate under which a Yacht has sailed in any race or races be proved to have been incorrect for any reason, the National Authority may, after inquiry, correct such certificate as they may deem proper, and may revise the claim of the Yacht to the prizes which she may have been awarded in such race or races.

YACHT RACING ASSOCIATION.

INTERNATIONAL RULE OF MEASUREMENT—*continued.*

CERTIFICATE NOT TO BE GRANTED TO YACHTS UNDER WEIGHT NAMED IN RULE.

No certificate of rating shall be granted to any Yacht weighing less than the minimum weight prescribed in the rule, nor having a centre-board of greater weight than prescribed by the rule.

OBLIGATIONS OF OWNER RESPECTING CERTIFICATE.

The certificate of rating shall cease to be valid under any of the following contingencies:—

(*a*) If any dimension measured for rating, except freeboard, is found to exceed the measurement stated on the certificate.

(*b*) If one or both of the length marks fall within the length immersed when the Yacht is lying in smooth water in measurement trim.

(*c*) If any alteration is made so as to increase the beam or girth or girth difference or the length of any spar or spars, or the sail area, as respectively measured for rating.

(*d*) If any length or girth or immersion mark is moved from its position.

(*e*) If the weight is reduced to less than the weight prescribed by the rule.

(*f*) If the fittings do not comply with the tables.

(*g*) At the expiration of two years from the date of the certificate.

In such case the owner or his representative shall forthwith notify in writing the invalidity of the certificate to the Secretary of the National Authority. A fresh or re-dated certificate will afterwards be issued, to be in force from the completion of re-measurement, or from the date the certificate expires under clause (*g*).

It is especially incumbent on the owner, or his representative, to ascertain from time to time by inspection of the marks, whether the immersion of the Yacht has from any cause whatever become such as to render the certificate invalid.

PENALTY FOR INFRINGEMENT OF PROVISIONS RELATING TO CERTIFICATE.

If an infringement of any of the foregoing provisions in respect of the validity of the certificate of a Yacht should, in the opinion of the National Authority, be proved against any Yacht, such Yacht shall be liable to be disqualified by the National Authority from starting in any race sailed under these Rules for the remainder of the current year, or such period as the National Authority may direct, reckoning from the date at which her certificate is proved to have become invalid.

INSPECTION TO BE PERMITTED BY OWNER.

Every owner sailing under these Rules shall permit all reasonable inspection by or on behalf of the National Authority, and shall afford all reasonable facility to carry out such inspection in regard to measurements, marks, fittings, and such other matters as fall within the scope of a measurer's duty.

FEES FOR MEASUREMENT.

The owner of a Yacht shall pay all fees and expenses for measurement.

RULES AND TIME ALLOWANCE FOR "A" CLASS.

SPECIAL CONDITIONS.

1. That A class shal be for schooners (ketches and luggers) and yawls only.

2. Schooners, ketches and luggers shall for time allowance be entitled to sail at 0·88 of their rating against yawls

3. The time allowance shall be 4 seconds per metre of rating per nautical mile.

4. That clubs may be allowed to divide the A class into two Sections, viz.:—

(I) above 23 metres not above 27 metres.

(II) above 27 metres

In all A class races the time allowances between Yachts must be calculated on each Yacht's rating as reduced by rig allowance.

TIME ALLOWANCE.

The time allowance scale in A class shall be as follows:

Metres Rating.	Seconds per Nautical Mile.	Metres Rating.	Seconds per Nautical Mile.
23·00	0	24·25	5
23·25	1	24·50	6
23·50	2	24·75	7
23·75	3	25·00	8
24·00	4		

and so on. Any fraction above the unit of rating will be counted as 0·25; for example: 25·01 metres will count as 25·25, and 25·26 metres as 25·5 metres.

RIG ALLOWANCE.

A yawl's mainsail shall not exceed 0·37 of her total sail area, and her mizen must not be less than one-sixth of the area of her mainsail. In schooners, the foreside of the mainmast at the deck shall be not farther forward than 0·55 of the water-line length from its fore end.

Ketches and luggers shall be reckoned for time allowance as schooners, provided that in a ketch the distance between the masts does not exceed half the water-line length of the Yacht, and that the smaller sail is carried aft.

YACHT RACING ASSOCIATION.

INSTRUCTIONS TO MEASURERS.

1.—TRANSLATIONS.

Each National Authority may issue a translation of these Instructions for the use of the Measurers.

2.—PERSONAL DISABILITIES OF MEASURERS.

Measurers of any National Authority shall not measure:—
(*a*) Yachts which they have themselves designed or built or in the construction or alteration of which they have in any respect taken part.
(*b*) Yachts which have been built by firms in which they have a business interest.
(*c*) Yachts of which they are themselves the owners or part owners.
If necessary, in such cases a special measurer may be appointed for the purpose by the National Authority.

3.—EXTRA MEASUREMENTS FORBIDDEN.

The measurers are not allowed to take other measurements than those necessary for determining the rating, except as may be expressly enjoined by the National Authority.

4.—DISPLACEMENT AND WEIGHTS IN KEEL AND CENTRE-BOARD YACHTS.

The owner must furnish the measurer with a certificate from the designer or builder, stating that the displacement of the yacht and the weight of the centre-board are according to the rule. Should the certificates referred to above prove to be false the National Authority may exclude the vessel and all later ones of the owner, designer, or builder in question from all races.

5.—CABIN FITTINGS, &c.

The measurer, before certifying the measurement as complete (see par. 7), must satisfy himself that the cabin dimensions and fittings comply with the table in the International Rule.

6.—DOUBTFUL CASES.

If from any peculiarity of build, construction, or fittings of any yacht, the National Authority, on the report of the measurer, are in doubt as to the application of the rules or instructions, or the calculation of the rating, they shall report the case to the International Committee of Referees, who after due inquiry shall award such certificate of rating as they may deem equitable; and the measurement shall be deemed incomplete (see par. 7) until this has been done.

7.—CERTIFICATE OF RATING.

Immediately the measurements are complete, the measurer shall forward the same to the National Authority and shall hand to the owner or his representative an intimation in the following form: *I beg to inform you that the measurement (or re-measurement) of the Yacht..... is complete and that the Yacht now holds a valid Certificate. The Certificate, stating the rating of the Yacht, will follow in due course.*

Signed, this ... day of.....

..... Official Measurer.

8.—MEASUREMENTS AND CALCULATIONS.

Metres—All decimals beyond the 3rd place shall be disregarded.
Feet—All decimals beyond the 2nd place shall be disregarded.

9.—MEASURING INSTRUMENTS.

All measurements must be taken with a steel tape or with rods (or an ordinary measuring rule may be used in case of measurements of less than one metre); and all such instruments must be approved by the National Authority.

10.—MEASUREMENT BOOKS.

The measurements are to be entered in a book with printed measurement forms approved or supplied by the Council of the National Authority, and such books, as entered up, must be at all times open to inspection by the Secretary or Council of the National Authority, or by the Committee of Referees if required. All measurements must be taken twice and a third time if there is material disagreement, and recorded in the measurement book.

11.—MARKS TO BE OF STANDARD PATTERN.

The measurement marks are to be of the standard pattern sanctioned by the Committee of Referees, and are to be supplied to yachts through the Executive of the National Authorities. The several marks will be referred to in these Instructions by the letters by which they are denoted in the enumeration below.

12.—VERIFICATION OF MARKS.

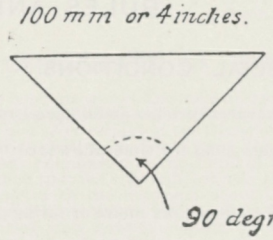
The marks are to be affixed at the expense of the owner and their positions verified by the measurer.

13.—ENUMERATION OF MARKS.

The requisite marks are as follows:—
Length marks, L.
Mid-girth marks, G.
Over-hang girth marks, O.
Immersion marks, I.

The length mark L is a rectangular mark not less than 12 mm. or ½ inch in width and 150 mm. or 6 inches in length.

The girth and overhang marks, G and O, are square marks of 20 mm. or ¾ inch in size, respectively marked with the letters G and O. The immersion mark I is a Triangular mark thus:—



14.—NO DEFINITE COVERING BOARD LINE.

Where the yacht has no clearly defined line of upper edge of covering board, the owner must define by a paint line the line, which is to be taken for the purposes of measurement. The measurer must satisfy himself that such paint line shows a fair sheer profile, and is not higher than is fairly equivalent to the deck edge. Such line must not be painted over, and any alteration of it will *ipso facto* cancel the certificate of rating.

YACHT RACING ASSOCIATION.

INSTRUCTIONS TO MEASURERS—*continued.*

15.—BEAM.

For measuring the beam, B, a plumb-line must be suspended on each side of the yacht from a transverse batten so that both hang just clear of the side when the yacht is upright, and the distance must be measured between the lines. The lines must hang clear of any mouldings, wales, or doubling planks but not of channels, unless in the opinion of the measurer they are larger than necessary, so as to add materially to the stability, in which case they must be reported and the matter dealt with as provided under par. 6. The measurement must be tried in several places, and finally taken where found greatest. The beam measurement may be made with the yacht either afloat or ashore.

16.—MID-GIRTHS AND GIRTH DIFFERENCE.

For these measurements, the yacht must be on shore, suitably blocked up at the expense of the owner; and the marks L, G and O must have been provisionally fixed on. The marks G and O must be fixed on the edge of, or close below, the covering board, one on each side of the yacht.

17.—CHAIN GIRTH.

I. The measurer has first to ascertain if the G mark is fixed at or abaft 0·55 from the fore end of the L. W. L.; if so, he next has to ascertain if the keel underside line abaft that station is straight (except for a reasonable round up at the extreme after end); in this case the greatest girth abaft G may exceed the girth at G by no more than 3 per cent.

II. In all other cases he has to test that the girth mark is fixed at that part of the yacht where the girth measurement is greatest. Should the girth measurement be the same at several stations, that which is nearest to the greatest beam shall be adopted.

III. The chain girth Gc is to be measured through the centre of the marks G from the upper side of covering board round the keel to the upper side of the covering board again, perpendicular to the waterline. The measurement must be taken outside any mouldings but not channels as provided in respect of beam measurements in par. 15.

IV. Should there be any hollow in the fore and aft under water-profile tending to reduce the girth measurement, the girth and difference measurements shall be taken under a keel line of the same thickness, excluding such hollows.

18.—SKIN GIRTH.

The skin girth Gs is to be measured between the same points as the chain girth Gc and along precisely the same track, only following the surface of the skin in all hollows except such as are caused by projecting mouldings or the edges of the planks in a clinch built boat. The girth difference *d* is to be obtained by deducting Gc from Gs.

19.—OVERHANG GIRTHS AND MARKS.

For these measurements, the yacht may be either afloat or ashore and the marks O and L must have been fixed on. The marks O must be fixed on the edge of or close below the covering board, one on each side of the yacht, at both ends vertically above the outer edges of the L marks.

The overhang girth at each end must be measured as the shortest chain girth from the upper edge of the covering board on one side to that on the other directly above, and through the centre of the marks O, passing under the fore and aft profile line in the plane of the outer edges of the marks L.

20.—YACHTS OF PECULIAR CONSTRUCTION.

If the water-line ending be at the stern-post so that the tape measure cannot be laid round from gunwale to gunwale, the girth of each side is to be taken separately, and the two measurements are then to be added together; and the thickness of the stern-post is to be added.

If from any form of construction the marks O cannot be placed on the covering boards in a vertical line above the L marks they shall be placed as near thereto as possible, and the overhang girth shall be measured at the points indicated by the marks as placed.

If for any reason there is placed any contrivance at the stem or stern in order to avoid the measuring of the overhang, such contrivance shall be disregarded in measuring the overhang girth.

21.—LENGTH MARKS.

For length measurement, the marks L must have been fixed on in a transverse plane at a right angle to the water-line, thus :—

Fig. 1.

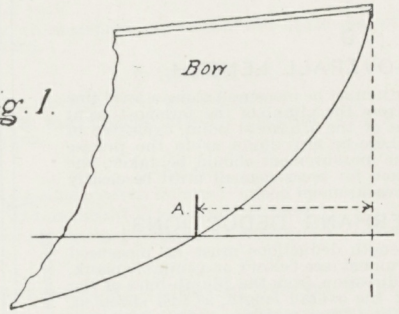


Fig. 2.

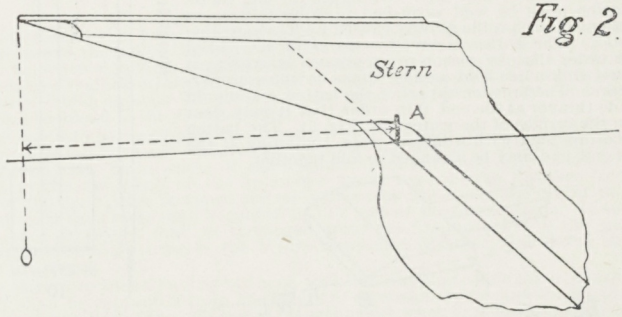
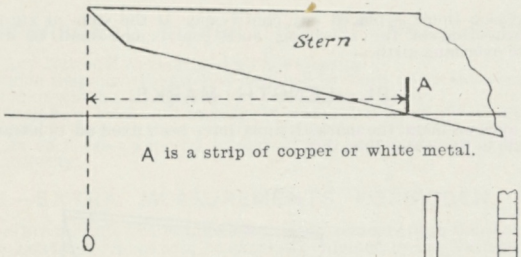


YACHT RACING ASSOCIATION.

INSTRUCTIONS TO MEASURERS—*continued.*

Fig. 3



22.—OVERALL LENGTH.

The overall length must be measured along a level line above the deck, from the plumb of the foremost point of the hull to that of the aftermost point, exclusive of rudder. Should there be any doubt as to the precise point to which the measurement should be taken, the point actually taken for measurement must be clearly described in the measurement book.

23.—OVERHANG DEDUCTIONS.

The overhang length deductions must be measured by a wooded instrument (see below), or a suitable plank, in a fore and aft direction, from the plumb-lines of the respective ends of the overall length, as just specified, to the edges, furthest from midship of the respective marks L.

MEASURING INSTRUMENT.—A wooden measuring batten made according to Fig. 4 serves to determine the lengths of the fore and after overhangs of the yacht. The batten must be well varnished in order to prevent alterations in its specific gravity caused by its absorption of water. The batten is broadened out at its ribbed end in order that, by reason of its greater buoyancy, it may not sink when held against stems having considerable rake. The broadened part of the batten A B should be made thinner at the end B in order that it may float just on the surface of the water (see Fig. 5). The batten may be provided with a metric scale, beginning at the ribbed end, and may be arranged to fold together.

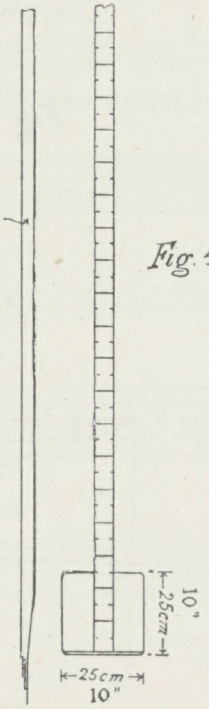

Fig. 4

24.—WATER-LINE LENGTH.

The length to be recorded as the "water-line length" is the overall length as specified in par. 22, minus the sum of the overhang deductions at the two ends as specified in par. 23.

25.—PROJECTIONS, NOTCHES, OR HOLLOWS.

When the length of the yacht below the water-line is longer than on the line of measurement, such longest length is to be taken as the length-for-measurement.

Should there be any notches or hollows in the stem, stern-post or stern of the yacht intended to reduce the length-for-measurement, these are to be taken into account by bridging, in the determining of the length, when they are within a vertical distance of 15 cm. above or below the measurement water-line.

Such notches or hollows shall not affect the placing of the length marks L or the overhang marks O or the measuring of the overhang girths.

26.—IMMERSION MARKS.

The immersion marks I on both sides must be plumb under the marks G and the bottom corners just touching the water-line.

27.—FREEBOARD.

The freeboard is the vertical distance from the water level to the upper edge of covering board through the centres of the marks O, G, and O, forward, amidships, and aft, on both sides of the yacht.

28.—FLOAT TEST AND MEASUREMENT.

For the purpose of the afloat test and measurement, all the official marks enumerated must have been fixed on.

The yacht must be lying in smooth and still water in her usual racing trim, and with her anchors, chains and warps on board, but without any persons on board, to enable the measurer to test that the length marks, L, do not fall within the length immersed, and to measure the freeboards.

In the event of it being necessary to measure a yacht in fresh water, the measurer shall require the designer or builder to furnish him with a certificate showing the difference in the line of immersion in water of a specific gravity of $\frac{1}{35}$th less than open sea water, and the Rating shall be calculated with an allowance according thereto, in the manner prescribed by the National Authority, with the concurrence of the Permanent Committee. The marks shall be fixed for the immersion in fresh water, with an additional immersion Mark I for the immersion in salt water.

The Certificate of Rating of a yacht so measured shall be endorsed "Fresh Water Certificate."

CENTRE-BOARD YACHTS.

29.—CONDITIONS FOR GIRTH MEASUREMENTS AND MEASUREMENT OF DRAUGHT.

The yacht must be prepared at the expense of the owner for girth measurement as specified in paragraph 16, with the addition that the yacht must be so blocked up as to admit of the greatest depth of the centre-board below keel-line being correctly measured. The measurer must first measure the vertical depth from upper edge of covering board at the marks G, to the underside of keel, by measuring down on both sides to a straight batten passed under the keel; and he must deduct from this the mean freeboard at girth station to give the draught of the yacht, in order to find if the

YACHT RACING ASSOCIATION.

INSTRUCTIONS TO MEASURERS—*continued.*

draught is more or less than one-third of the beam according to the rule for centre-board yachts. If the draught is more than one-third of the beam the measurement of the girth and of the girth difference to be taken as in the keel yachts. If on the contrary the draught is less than one-third of the beam the measurement of the girth and of the girth difference is to be taken round an artificial keel line distant below the bottom of the actual keel by twice the difference between the actual draught and one-third of the beam. The chain girth for use in par. 32 is in both cases the chain girth taken as above plus one-half of the greatest depth of the centre-board from the underside of the keel. All other measurements to be taken as in keel yachts.

30.—LOWEST POSITION OF CENTRE-BOARD.

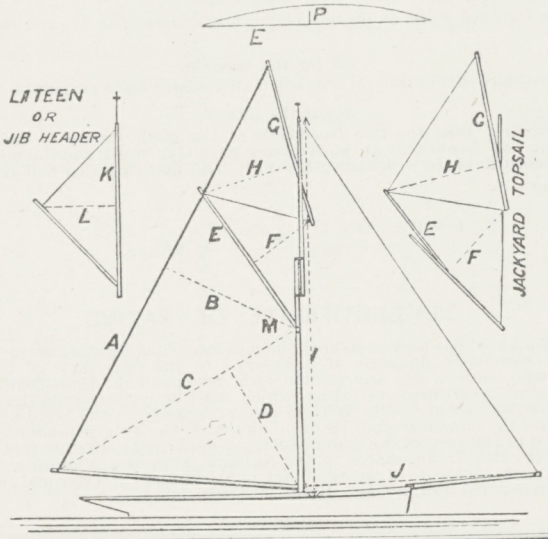
The position of the centre board of a yacht is to be accounted the lowest which such centre-board assumes when let down to the utmost degree of which its construction or that of its lowering gear will admit. A simple knot in a hempen or wire rope is not admissible as a stopping-appliance for the lowering gear. In the case of older yachts a large hard-soldered knot in a steel wire rope may be looked upon as a suitable stopping-appliance.

In the case of new yachts it is the duty of the measurer to require the construction of the centre-board to be such that its position for measurement is the lowest one to which it can be let down. The stopping-appliance for the centre-board must consist of a bolt, or such like object, fitted in suitable manner in the centre-board casing.

31.—SAIL AREA.

(*a*) Measurements.

The Secretary of the National Authority shall supply sailmakers, upon request, with diagrams in accordance with the subjoined sketch, and the measurements shall be taken as follows:—



MAINSAIL.

A.—Measured from the top of the extreme out-board end of the boom to the underside of the extreme out-board end of the gaff.

B.—Perpendicular to A, measured to the lower edge of a black band or other distinctive mark on the mast (hereinafter described as M), above which mark the throat cringle of the mainsail shall not be hoisted.

C.—Measured from top of boom at the lower end of A, to the mark M on the mast.

D.—Perpendicular to C, measured in to the mast, in a line with the top of the boom, or to tack cringle of mainsail, if below top of boom.

YARD TOPSAIL.

E.—Measured from the mark M on the mast to extreme out-board end of gaff; or extreme out-board end of jackyard.

F.—Perpendicular to E, measured to lower end of yard.

G.—Extreme length of yard.

H.—Perpendicular to G, measured to extreme out-board end of gaff; or extreme out-board end of jackyard.

JIB HEADER.

K.—Measured from the mark M to top of topmast.

L.—Perpendicular to K, measured to extreme out-board end of gaff; or extreme out-board end of jackyard.

LUGSAIL.

To be measured as mainsail except as follows:—

B. and C.—Forward end measured to lower end of yard.

D.—Lower end measured to tack cringle of mainsail, if below top of boom, or forward of mast.

POINTS OF MEASUREMENT WHICH MAY BE DEFINED BY BLACK BANDS.

At the option of the owner the outer points of measurement on the boom, gaff or yard, topsail yard, jackyard and topmast, namely, the extremities of the lines A, E, G and K, may be black bands, beyond the inner edges of which the sail must not be extended.

HEAD SAILS.

I.—The perpendicular I to be measured from the deck of the foreside of the mast to where the line of the luff of the foremost head sail or of the spinnaker halyard, as the case may be, when extended, cuts such perpendicular. In the case of a schooner the perpendicular I shall be measured upon the foremast, unless she has a main-spinnaker the height of which exceeds the perpendicular upon the foremast, in which case the excess shall be added to the perpendicular I.

J.—The base J to be measured from the foreside of the mast to where the line of the luff of the foremost head sail when extended cuts the bowsprit, other spar, hull, &c., as the case may be. In all cases, if the distance from the centre fore and aft line of the mast to the outer end of the spinnaker boom exceeds the distance from the foreside of the mast to the bowsprit end (where cut by the line of the luff of the fore-most head sail), the excess shall be added to the base of the fore triangle. In the case of a schooner the base J shall be measured from the foremast, but if the main or longest spinnaker boom exceeds the before-mentioned distance, the excess shall be added to the base J.

In the case of a yacht having no head sail, but carrying a spinnaker, the area for head sail shall be computed from the length of spinnaker boom, and the height from deck to where the line of the halyard of the spinnaker when extended cuts the mast.

YACHT RACING ASSOCIATION.

INSTRUCTIONS TO MEASURERS—*continued.*

A spinnaker may have a head-stick or board not longer than one-twentieth the length of the spinnaker boom, but not a foot yard, or more than one sheet, or any other contrivance for extending the sail to other than a triangular shape.

In the case of a yacht carrying a square-sail, or square topsail, or raffee (together or separately), the actual area of the same shall be computed: and if such area exceed the area of the fore triangle, the excess shall be used in the total area for determining the rating.

FORESAIL OF SCHOONERS.

To be measured as mainsail, except that the lower end of A is to be taken at foreside of mainmast, in a line with the main boom goose-neck.

(*b*) Directions for Measuring Sails.

The measurer shall himself take measurements I and J for fore-triangle, G and E for yard topsail, and the length of spinnaker boom. If the other measurements are supplied by the sailmaker, the measurer shall check them himself by measuring the following:

Mast: from line of top of boom to mark M.

Boom: from lower end of A to lower end D.

Gaff, or lug yard: from upper end of A to forward end of B.

Jackyard topsail: sheet to outer end of jackyard or band.

In cases where it is necessary for the measurer to measure the sails, he shall do so in the following manner:—Take the extreme length of the boom and gaff, or the length to the inner edges of the black bands thereon as the case may be; then hoist the sail with the tack fast and set the peak and luff up taut, and let go the topping lifts so that the weight of the boom comes on the leach of the sail. When properly set the mainsail must not extend beyond the inner edges of the black bands on the boom and gaff, nor must the throat cringle of the mainsail be above the lower edge of the black band M on the mast. With a line and tape, measure the leach and luff and the diagonal C. For the head sail measure the height I, and the distance J, as provided for in the section dealing with head sail. For topsail the sail should be hoisted and marked in a line with the gaff: then lowered and the other dimensions taken. From the measurements so taken a sail plan should be drawn to scale and the other above-specified measurements obtained therefrom. The National Authority, however, shall have power to vary the details of the above mode of measurement in any way which, in their opinion, may promote greater accuracy.

(*c*) Calculation of Sail Areas.

MAINSAIL.

Multiply A by B and C by D and add the two products together and divide by 2.

YARD TOPSAIL.

Multiply E by F and G by H, and add the two products together and divide by 2.

JIB HEADER.

Multiply K by L and divide the product by 2.

HEAD SAILS.

Multiply I by J and divide by 2.

LUG SAILS AND HEAD SAILS.

No deduction is to be made from head sail area on the score of any portion of the lug sail area ahead of the mast.

SAILS BOUNDED BY CURVED EDGES.

Any increase in the area of sails due to curved edges, extended by battens or otherwise beyond the line between the points for measurement, shall be computed as follows: Multiply the base, E by two-thirds of the perpendicular, P. *See* page 753.

32.—DETERMINATION OF RATING.

L for the formula.

To determine L for the formula add to the water-line length (par. 24) the difference between the overhang girth (par. 19) and the freeboard, measured on both sides forward (par. 27), and one-fifth of the difference between the overhang girth and the freeboard, measured on both sides aft (par. 27).

B for the formula.

B is measured as described in paragraph 16.

G for the formula.

To determine G for the formula deduct from chain girth (par. 17) the freeboard measured on both sides at the girth station (par. 27). In the case of a centre-board yacht the freeboard measured on both sides at the girth station (par. 27) is to be deducted from the chain girth determined as stated in par. 29.

d for the formula.

d for the formula is the difference between the chain (par. 17) and the skin girth (par. 18).

$\sqrt{S}$ for the formula.

$\sqrt{S}$ is the square root of the sail area calculated according to paragraph 31.

F for the formula.

To determine F take the two freeboards at the girth station G, and the mean between the two freeboards at the overhang girth O forward, and the mean between the two freeboards at the overhang girth O aft; add these together and divide by 4.

The rating—

$$\frac{L + B + \frac{1}{2}G + 3d + \frac{1}{3}\sqrt{S} - F}{2} = \text{Rating.}$$

33.—CERTIFICATE OF RATING.

As soon as a yacht has been measured, the measurer shall forward the measurements (with the sailmaker's diagram, if necessary), to the Secretary of the National Authority who shall in due course, and after receipt of the Classification Society's Certificate, issue a certificate of rating, which shall be in force from the date of the completion of the measurement. If from any peculiarity in the build of the yacht, or other cause, the measurer shall be of opinion that the rule will not rate the yacht fairly, or that in any respect she does not comply with the requirements of these rules, he shall report the circumstances to the National Authority who, after due inquiry, shall award such certificate of rating as they may consider equitable, and the measurement shall be deemed incomplete until this has been done.

YACHT RACING ASSOCIATION.

INSTRUCTIONS TO MEASURERS—*continued.*

FEES FOR MEASURING.

The Measurers shall collect the fees before measuring, and be responsible for the same to the Hon. Treasurer.

The fees shall be as follows:—

Partial measurements.

(*a*) For measuring length, beam and spars, or for length and spars or sail area:—

	Members. £ s. d.	Non-Member. £ s. d.
7 metres rating and under	0 15 6	1 1 0
Over 7 metres and not exceeding 15 metres ...	1 1 0	1 11 6
Exceeding 15 metres	1 11 6	2 12 6

(*b*) For measuring length and beam only if carried out conjointly: Half above fees.

(*c*) For measuring spars or sail area only: Half above fees.

(*d*) For measuring girth or girth difference:—

	Members. £ s. d.	Non-Members. £ s. d.
7 metres rating and under	1 1 0	1 7 6
Over 7 metres and not exceeding 15 metres ...	1 11 6	2 2 0
Exceeding 15 metres	2 2 0	2 15 6

(*e*) For attending at a weighing: 10*s.* 6*d.*

2. Complete Measurements for a Y.R.A. Certificate of Rating.

For measuring length, beam, girth, girth difference, bowtax, freeboard spars (and sail area, if necessary):—

	Members. £ s. d.	Non-Members. £ s. d.
7 metres rating and under	1 16 0	2 8 6
Over 7 metres and not exceeding 15 metres ...	12 0	3 13 6
Exceeding 15 metres	3 13 6	5 8 0

FEE FOR A DUPLICATE CERTIFICATE WHEN NO NEW MEASUREMENTS ARE REQUIRED, 5*s.* (payable to Secretary direct).

Upon measuring days fixed by a Yacht Club, boats of 7 metres rating and under will be measured at an inclusive fee of £1 12*s.* 6*d.*, and half fee for girth only, or for length and beam only, or for spars only. The Yacht Club in such cases must pay the Measurer's travelling expenses. This scale applies only when not fewer than four yachts are measured on one day.

When a Measurer has to travel any distance specially to measure one yacht, the owner must pay his travelling expenses.

Upon regatta days, if sufficient notice is given to the Secretary that yachts require measurement, the fees will include the Measurer's travelling expenses; but for special visits to measure, the attendant travelling expenses must be paid by the owner of the yacht.

Ample notice must be given to the Secretary by the owner as to when his yacht is ready for girth measurement.

NUMBERS ON SAILS.

(The Sail numbers allotted by the Secretary, Y.R.A., are for British Waters only.)

(*a*) That the schedule shall be as follows:—

Class.	Letter.	Height of Figures.	Width occupied by each figure except Fig. 1.	Minimum thickness of every portion of each figure or letter.	Minimum space between adjoining figures.
A	A	30 inches	20 inches	4 inches	6 inches
23 metres	B				
19 „	C				
15 „	D				
12 „	E	26 inches	17 inches	4 inches	6 inches
10 „	F				
9 „	G	20 inches	14 inches	3 inches	4 inches
8 „	H				
7 „	K				
6 „	L	18 inches	12 inches		
5 „	M				

(*b*) The index letter (in black) shall be equal in size to and carried above the numeral (also in black), and may be either marked on the sail or on a piece of cloth attached to the sail.

(*c*) The numbers, which shall commence with 1 in each class, shall be allotted by the Secretary of the Y.R.A. upon application, and shall remain in force to the close of the season, unless previously cancelled by him.

"*Where practicable, the same numbers as on the sails should be used for recall numbers also.*"

INDEX SERVANT À DISTINGUER LES YACHTS PAR LEUR PAVILLON.

INDEX ZU DEN NAMENSFLAGGEN DER YACHTEN.

With a view to facilitate reference at sea, the Distinguishing Flags of Yachts have been arranged according to colours :—
1st, White; 2nd, Red; 3rd, Yellow; 4th, Green; 5th, Light Blue; 6th, Dark Blue; 7th, Black.
Combinations of two or more colours generally follow the principal colour in the order above.
In Flags with vertical designs the colour next the mast is the principal colour; in horizontal designs, the top colour.
